HYGIENIC CERTIFICATE B.BK.60111.0777.2022
ORYGINAL

NATIONAL INSTITUTE OF PUBLIC HEALTH NIH – NATIONAL RESEARCH INSTITUTE

Product: **Ecological (water-based) Thermal-Reflective-Thermal Insulating Mass/Plaster/Coating DIGNA PLUS**
Containing: acrylic/styrene copolymer, mineral fillers, biocides and other ingredients as specified in the manufacturer's documentation
Destined: for use inside residential and industrial buildings, including food production plants and public utility facilities, incl. hospitals, as a thermo-reflective and thermal insulation coating to walls, partitions, and other building structures

The above named product meets the hygienic requirements when the following conditions are fulfilled:
The product must be used in accordance with the manufacturer's instructions and current regulations regarding the facility in which it is intended to be used. In the case of healthcare facilities, the product must meet the requirements of the Regulation of the Minister of Health dated 26 March 2019 (Journal of Laws 2019, item 595). The packaging should bear a label in the Polish language containing precautions according to the product's safety data sheet, in accordance with applicable legal regulations. The product should be stored in a place inaccessible to children. After application, the area should be ventilated to dissipate any odor before being put into use. The hygienic certificate does not include an assessment of the product's direct contact with food, agri-food and pharmaceutical products, or drinking water. The hygienic certificate does not apply to technical parameters, utility values and evaluation of the product's allergenic properties.
